## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-39, drawn to an apparatus, classified in class 156, subclass 345.1.
  - II. Claims 40-43, drawn to a method, classified in class 438, subclass 689.
  - III. Claim 44, drawn to an insulating plate, classified in class 428, subclass 49.
2. The inventions are distinct, each from the other because they are unrelated to each other. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).
3. Invention I is drawn to an apparatus, which is not the subject of the other inventions in Inventions II-III. The apparatus can be used to etch structures unrelated to semiconductor wafers and does not require an insulating plate.
4. Invention II is drawn to a method, which is not the subject of the other inventions in Inventions I and III. Semiconductor wafers can be etched using non-plasma methods and does not require an etching apparatus or an insulating plate.
5. Invention III is drawn to an insulating plate, which is not the subject of the other inventions in Inventions II-III. An insulting plate has many functions unrelated to either an etching apparatus or semiconductor etching.

Art Unit: 1765

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. Additionally, these inventions have acquired a separate status in the art as shown by their different classification, and thus restriction for examination purposes as indicated is proper. Moreover, the search required for Invention I is not required for Inventions II-III; the search required for Invention II is not required for Inventions II and III; the search required for Invention III is not required for Inventions I and III, thus restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
